#### Data

Load dataset and sampling effort per individual plant:

```

  arrange(ind)

## dbl (21): Acridotheres_fuscus, Buceros_bicornis, Corvus_macrorhynchos, Dendrocitta_leucogastra, Ducu
## i Use 'spec()' to retrieve the full column specification for this data.
## i Specify the column types or set 'show_col_types = FALSE' to quiet this message.
